

Selecta one is a world-leader in breeding, producing and marketing of vegetatively propagated ornamental plants. Our breeding activities include bedding and balcony plants, pot plants, perennials and cut flowers. With eleven breeding, production and distribution sites the corporate group serves all the relevant markets worldwide.

For our headquarters in Stuttgart we are currently looking for a

grower (m/f/x) young and mother plants

Yours tasks:

- Planning, implementation and follow-up of horticultural cultivation measures as well as phytosanitary measures on young and mother plants
- Monitoring and documentation of fertilizer solutions
- Support the organisation of workflows from harvesting plant material to dispatch
- Professional instruction of auxiliary staff
- Entry and maintenance of crop data in the relevant databases
- Support the sampling of phytopathological tests
- Assist the teams in harvesting cuttings etc.

Your qualifications:

- Well-grounded horticultural education with a professional development as master gardener or horticultural technician/engineer or several years of equivalent professional experience
- Working experience in cultivating mother plants of ornamental crops is beneficial
- Certificate of competence in phytosanitary measures
- High quality awareness and sense of responsibility
- Independent and well-structured working method
- Committed personality with passion and sensitivity for plants

Your benefits:

- Challenging and varied task with creative freedom
- Modern, safe and international working environment
- Very good development opportunities in a growing and internationally successful family business
- Flexible working hours
- Appropriate remuneration
