

**Selecta one** is a world-leader in breeding, producing and marketing of vegetatively propagated ornamental plants. Our breeding activities include bedding and balcony plants, pot plants, perennials and cut flowers. With eleven breeding, production and distribution sites the corporate group serves all the relevant markets worldwide.

For our headquarters in Stuttgart we are currently looking for a horticulturalist or agronomist as

## **Field Research Manager (m/f/x) Plant production**

### **Yours tasks:**

You are responsible for the planning, implementation, evaluation and documentation of trials within the production process. You research test-relevant topics and coordinate with the department product development and with the mother plant farms. Besides the scientific aspects your tasks also include horticultural and production relevant tasks like crop management, the implementation of cultivation measures as well as the organisation of the workflows. In this function, you contribute actively towards the optimisation of existing and introduction of new products.

### **Your qualifications:**

You possess a University degree (bachelor/master) in the areas of cultivation of ornamental plants, agronomy or a comparable educational attainment. Ideally, you have already gained professional experience in ornamental plant culture and/or experimentation. Your strengths include independence and the necessary attention to detail You enjoy working on complex tasks, you are motivated, and you like to work in an international environment. Furthermore, you have good knowledge of MS Office and a good command of German and English.

### **Your benefits:**

We offer you a challenging and varied task with creative freedom and very good development opportunities in a growing and internationally successful family business as well as flexible working hours and an appropriate remuneration.
